## GPod Mobile Acoustic Meeting Pod

New for 2019!

In addition to the industry leading acoustic ribs and panels manufactured by Gustafs in Dalarna, Sweden; the GPod is a new offering for the ever-growing meeting pod market. Meeting pods create small independent workspaces and consultation rooms that can be 'installed' to pre-existing spaces with minimal disruption. They work well in all workplaces and are especially useful in open-plan offices and call centres or anywhere that additional privacy or quiet space is needed.

The Gustafs GPod is one step above the current market for meeting pods; the flexibility and practicality of design and the acoustic power and inherent resistance to fire (Euroclass A2-s1,d0) derived from Gustafs acoustic panel system make the new product venture from Gustafs a natural leader.

### Green & Safe

- Natural Fire Safety, A2-s1,d0 surfaces
- No added Urea Formaldehyde
- Naturally very low emitting
- Produced with 100% renewable energy
- BREEAM and LEED recognised

### Features

- Silent and sound proof for 100% discrete conversations
- Privacy glass
- Adjustable lighting and temperature control
- Easy entrance – Full width saloon doors
- Adjustable tables for sitting or standing
- Choose your lay-out now and change in the future
- Integrated power points
- Wooden acoustic surfaces - inside and out
- Frameless and flush-finished design
- Gustafs acoustic Nano and Stripe technologies
- Approved for medical grade cleaning
- Real mobile by integral wheels or fork lift
- Quick-Up assembling

### Design

- Nano, Stripe and Linear design options
- Architectural wood finish quality
- Customise your Gpod with your own branding
- Match Gpod with other wall and ceiling timber cladding
- Configure your own pod to suit your needs
