University of Bedfordshire, Luton Campus Library. MosesCameronWilliams Architects (June 2016)

The new Library at the Luton campus of the University of Bedfordshire which opened in June 2016 was designed by Moses Cameron Williams Architects (of Cambridge) and project managed and installed by Willmott Dixon.

The University has been around for over 100 years and teaches in a wide range of subject areas as well as conducting award winning research across health, energy and technology, and social policy topics.

The library is spread over 7 floors including silent study rooms, group work and meeting spaces, computer labs and presentation facilities and a café as well as miles of bookshelves. Gustafs and LSA Projects supplied over 8,000 linear metres of ribs to the project for both wall and ceiling application covering around 450m<sup>2</sup>.

Over 3,000 individual 28mm deep ribs in natural Oak veneer have been used to clad the impressive open atrium and cafe area as well as throughout the library isles and study spaces. 12mm gaps between ribs give the entire installation depth, texture, and warmth as well as impressive acoustic control; perfect for a busy university library!

Gustafs Linear System is available in the UK only through LSA Projects Ltd.

If this inspires you for one of your projects we would love to hear from you!
