Inspiration: Metra ELS - NEW 2017 Brochure

Product: Metra Electronic Locking Systems and New Mobile Access

Bol.com Offices

Installation:
Mobile Access Control
Workplace Lockers at
Bol HQ in Utrecht, NL

LSA Projects are pleased to finally announce the release of the New 2017 Metra Electronic Locking Brochure covering their new range of workplace and leisure locking systems.

The brochure covers their new mobile app control system along side the existing range of RFID, Pin-Access and Touch Screen User Interface Terminals.

It is filled with inspiring locking solutions from their range as well as an introduction to each system and application; covering their product range from physical locking mechanisms to operating software.

The Metra range has digital solutions for all locker requirements; long term locker assignment for offices, hospitals, schools, colleges and universities as well as professional sports facilities.

Short term and daily locker rental is perfect for public and private sports centres as well as cloakrooms in workplaces and valuables lockers for laboratories and other clean-spaces.

Locker control is important for both daily and long term locker assignment; often physical keys can be impractical or not allowed at all past the point of storage. Metra has a range of control options that have moved far beyond traditional lock-and-key technology.

[Please get in touch with us](#) if you want to discuss upgrading your lockers or even just the way you use them. Digital locking is fast becoming the most popular, practical, and cost effective solution for all installations and Metra solutions can help keep you on top.

Metra is available in the UK only through LSA Projects Ltd.

Please follow the link on the right to download the Metra brochure.
