

Project: Octagon Centre

Architect: Leslie Jones Architects

Product: Gustafs Panel System®

A curving GUSTAFS wall lends form and functionality to this retail space in High Wycombe. The panel size of 2400mm x 600mm allows the panels to be curved at site to suit the desired radius.

The rotary cut birch veneer provides a warm aesthetic, allied with specific acoustic control and the best fire-resistance as standard.

The **GUSTAFS Panel System®** has been used on many mall and retail projects in the UK and worldwide.

If this inspires you for your projects, we would love to hear from you!
