

**Project:** The Royal Deck onboard The Royal Yacht *Britannia*

**Architect:** 442 Design

**Product:** Gustafs Panel System

This award winning project employed over 200m<sup>2</sup> of GUSTAFS ceiling panels in Natural Oak with an SH8 perforation, installed in facet.

Traditionally, the Royal Deck onboard *Britannia* would be covered with an awning and used by the Royal Family for cocktail parties and receptions. The historic appearance of the Royal Deck has been re-created with a spectacular awning-style roof, seamless glass walls and teak deck. The use of the GUSTAFS Panel System has allowed for perfect aesthetic and acoustic control within this newly created space.

LSA and GUSTAFS are proud and privileged to be involved in this superb project and our thanks to 442 Architects; the client The Royal Yacht *Britannia* Trust and the installation team Souness and Boyne, who won the Silver Judges Award at the Association of Interior Specialists (AIS) Awards.

If this inspires you for your projects, we would love to hear from you!
