**Project: Maritime Museum of Finland**

**Architect: Lahdelma & Mahlamäki**

**Product: Gustafs Panel System**

GUSTAFS of Sweden were approached to supply over 2000m<sup>2</sup> of plain and acoustic wall and ceiling panelling in American White Oak to the new Maritime Museum of Finland, based in Kotka.

The high demands for acoustic performance, aesthetics, fire resistance, longevity and very strong eco-considerations meant the client turned to GUSTAFS as the one-stop supplier for these criteria.

The complex design follows a wave form throughout the museum, which meant for a number of curved panels, installed seamlessly with the standard flat panels to create an elegant and bold space.

GUSTAFS have a history of working with maritime projects, having also supplied to the National Maritime Museum in Falmouth, UK in 2002, among others.

If this inspires you for your current projects, we would love to hear from you!
