

Project: Crownhill Crematorium

Architect: Architecture MK

Product: Dalhem Ribba 28mm American Oak Ribs

In Jan 2010 construction started on the new chapel at Crownhill Crematorium. The new chapel will be a distinctive, high quality public building with state-of-the-art audio visual facilities and will incorporate a number of innovative environmental benefits.

The architects chose to use 972m of Dalhem Ribba 28mm x 38mm American Oak Ribs to create an inverted barrel running along the centre of the building's barrel vaulted ceiling.

If this inspires you for your current projects, we would love to hear from you!
