Inspiration...

Issue 25

26 March 2013

Product: GUSTAFS Panel System®

Architect: Wingårdh Arkitektkontor

Project: SPIRA Performing Arts Centre, Jönköping, Sweden

GUSTAFS Panel System and GUSTAFS Linear System are used throughout this stunning building to offer high end aesthetics, perfect acoustic control and strong environmental credentials.

The larger concert hall is American Maple with the balconies in the smaller theatre specified as green stained panels to simulate a granny smith apple that the architect Gert Wingårdh brought to a meeting!

GUSTAFS Linear System ribs in different dimensions are used in the back of the big stage in conjunction with acoustic panels.

GUSTAFS supplied almost 10,000 m² of panelling and ribs, their largest ever single project order!

If your project interior demands the best aesthetics, acoustics and sustainability credentials then LSA have product solutions for you.

Have a Happy Easter!
