# Inspiration...

Issue 30

12 November 2013

**Product:** GUSTAFS Linear System Walls in Oak.

**Architect:** Brady Mallalieu **Contractor:** GTA Interior **Installer:** Lacunar Ltd

LSA are very proud to have supplied over 2000 linear meters of GUSTAFS Linear System to its first UK project at the central London office of Brown Rudnick LLP.

GLS has been used in the multi-use conference room and communal area of the building to improve the acoustics in the converted courtyard between the original buildings.

Aesthetically the ribs give the illusion of a room inside the atrium space, combining the open courtyard feel with the acoustic levels needed to make this a functional working environment.

Our thanks as ever to Brady Mallalieu for their specifications and Lacunar Ltd for superb quality of installation and attention to detail.

If this inspires you for one of your projects we would love to hear from you!
