

Individuality meets longevity

Interior fittings for companies and clubs

Modern and robust concepts for your success

GESCHWENDER INNENAUSBAU

Three generations of professional craftsmanship

Since 1977 our family owned and operated company has been designing and manufacturing innovative furniture products for all industry sectors from our base in Westerwald. With the third generation of family well established in the business, we are the first contact in Germany and across Europe for wet strength specialist interior construction; in particular new or refurbishment changing room facilities, sanitary facilities, office and reception areas.

Our focus is always on you, your guest's and customer's experience! Our qualified team implements your wishes reliably and professionally from planning to installation. The combination of years of experience, expert knowledge and the use of extremely robust materials form the basis for a durable facility.

Geschwender Innenausbau - we manufacture high quality, durable and robust interior work with passion and professional competence.

INTERIOR DESIGN IS OUR PASSION

We bring ideas to life

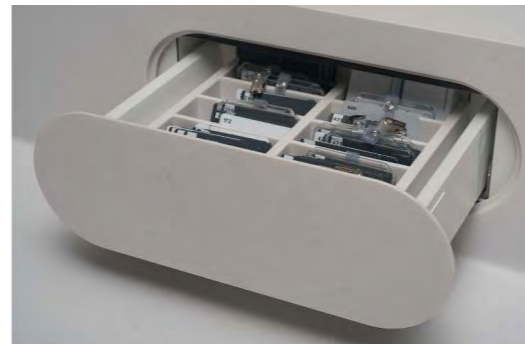

We are passionate about modern interior design; our team want to inspire you with our previous work and build a relationship together to develop new and creative ideas for your facilities; full of ambition, heart, passion, professional experience and knowledge.

fresh ideas and extraordinary concepts

YOUR PROJECT IN THE BEST HANDS

Benefit from our experience

What sets us apart:

- family owned and operated company with over 40 years of experience
- specialist in high-quality, wet-strength interior fittings
- highest quality manufacturing, under our full control in-house within our own factory: "Made in Germany"
- use of highly resilient materials such as HPL Compact, solid surface material and aluminum
- trained, expert staff from planners, architects, interiors designers and fitters
- Germany and Europe-wide service and installation
- comprehensive full-service support
- certified to DIN EN ISO 9001 Quality Management and DIN EN ISO 14001 Environmental Management

Quality that convinces - our quality promise!

We give you a 10-year guarantee* on your new facility - even if it is open 24 hours a day 365 days a year

* In addition to the statutory warranty, we give you a 10 year guarantee on HPL Compact and aluminium profiles. Third party items including locks and signage are excluded from the guarantee.

MADE FOR THE HIGHEST DEMANDS

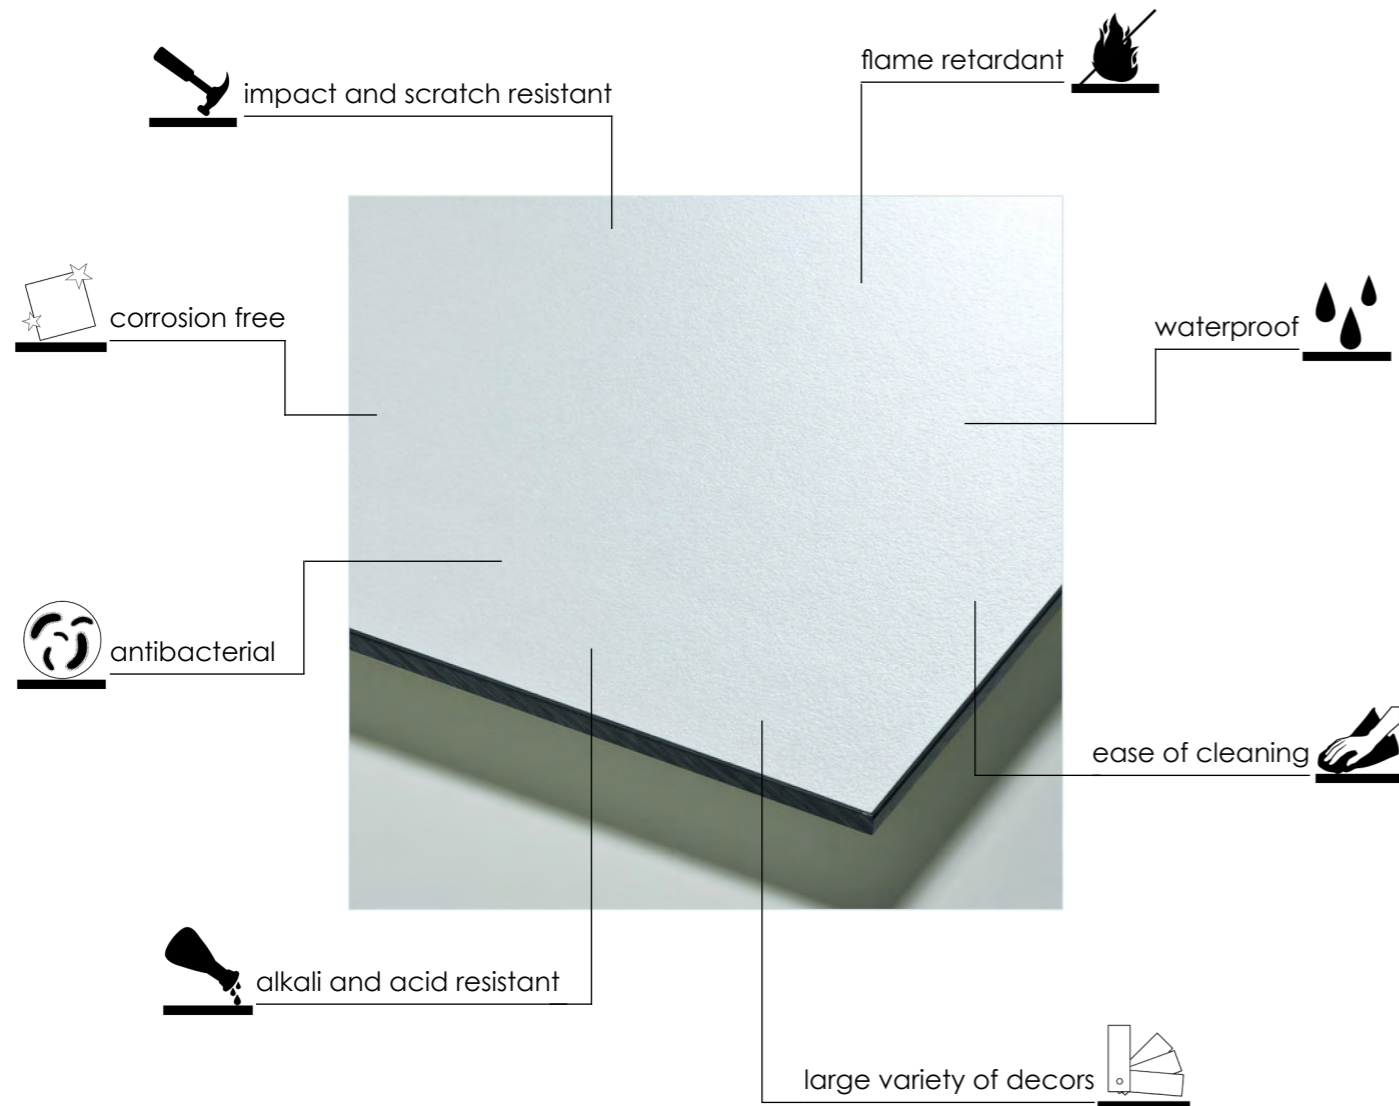

Highly durable and resistant HPL Compact

In high frequented areas of a company or club, the facility must withstand high stress everyday and at the same time ensure adequate hygiene. That is why we and our customers have been using highly resistant HPL Compact plates for many years.

HPL Compact (High Pressure Laminate) consists of layers of kraft paper (approx. 40 pieces) soaked in phenolic resin. The visible edges are made of decorative paper and soaked in melamine resin. The layers are then pressed together to form a homogeneous plate under high pressure (85 kg per square cm) and a high temperature of approx. 140° C. Typical traditional materials require an edge material which provides protection to the core board. This edging material can often separate from the core material, allowing bacterial growth within the gaps or even peel off completely, leaving a raw edge. HPL Compact does not require an edging material to be added, eliminating this ongoing maintenance issue.

The pore-free HPL Compact surface has been proven to provide an uninhabitable environment for germs and bacteria. After 24 hours, 99.9% of the bacteria on the surface will have died. The most effective and best means of hygiene is regular cleaning, HPL compact panel scores highly with its reliable, stronger resistance to aggressive or acidic cleaning agents such as limescale removers, sanitary cleaners and disinfectants.

All advantages of HPL Compact at a glance:

UNBEATABLE IN INTERIOR DESIGN

Quality at the highest level

The special manufacturing process makes HPL Compact a particularly robust and durable material. It withstands high demands in everyday working life. Even after many years, your new facility will not lose any of its effectiveness and function. Compared to other composite materials and materials, HPL Compact sets quality standards at the highest level.

That is why we at Geschwender Innenausbau rely on HPL Compact!

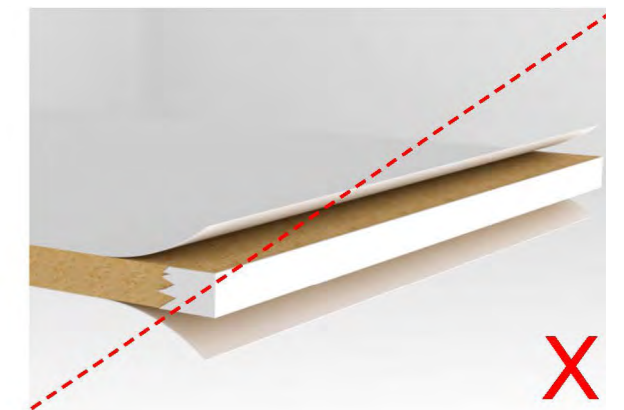

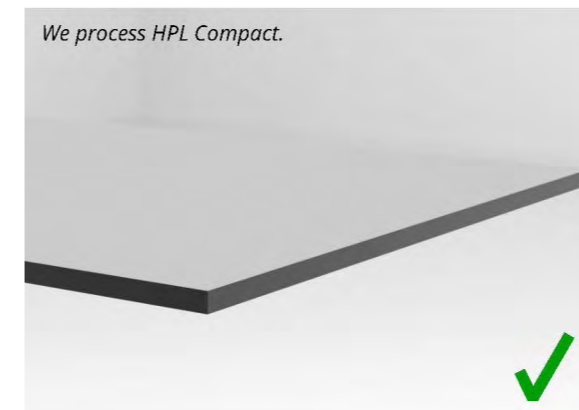

The comparison of materials makes it clear:

HPL Compact Board

- no edge banding necessary
- no moisture penetration
- material remains dimensionally stable
- non-porous material is hygienic and antibacterial
- quality is not compromised by drilling or cut-outs for sockets etc
- solid pressure formed material will not de-laminate or peel
- melamine resin causes extremely high impact and scratch resistance

Classic HPL Coated Carrier Board

- coated wood composite material
- requires on-site edge banding
- wood material carrier (chipboard, MDF or HDF) lined with decor paper
- prone to de-lamination of core material and facing
- open-pore wood material carrier board is exposed at drill points and cut-outs allowing moisture to penetrate and cause the carrier board to swell
- core material is not impact resistant

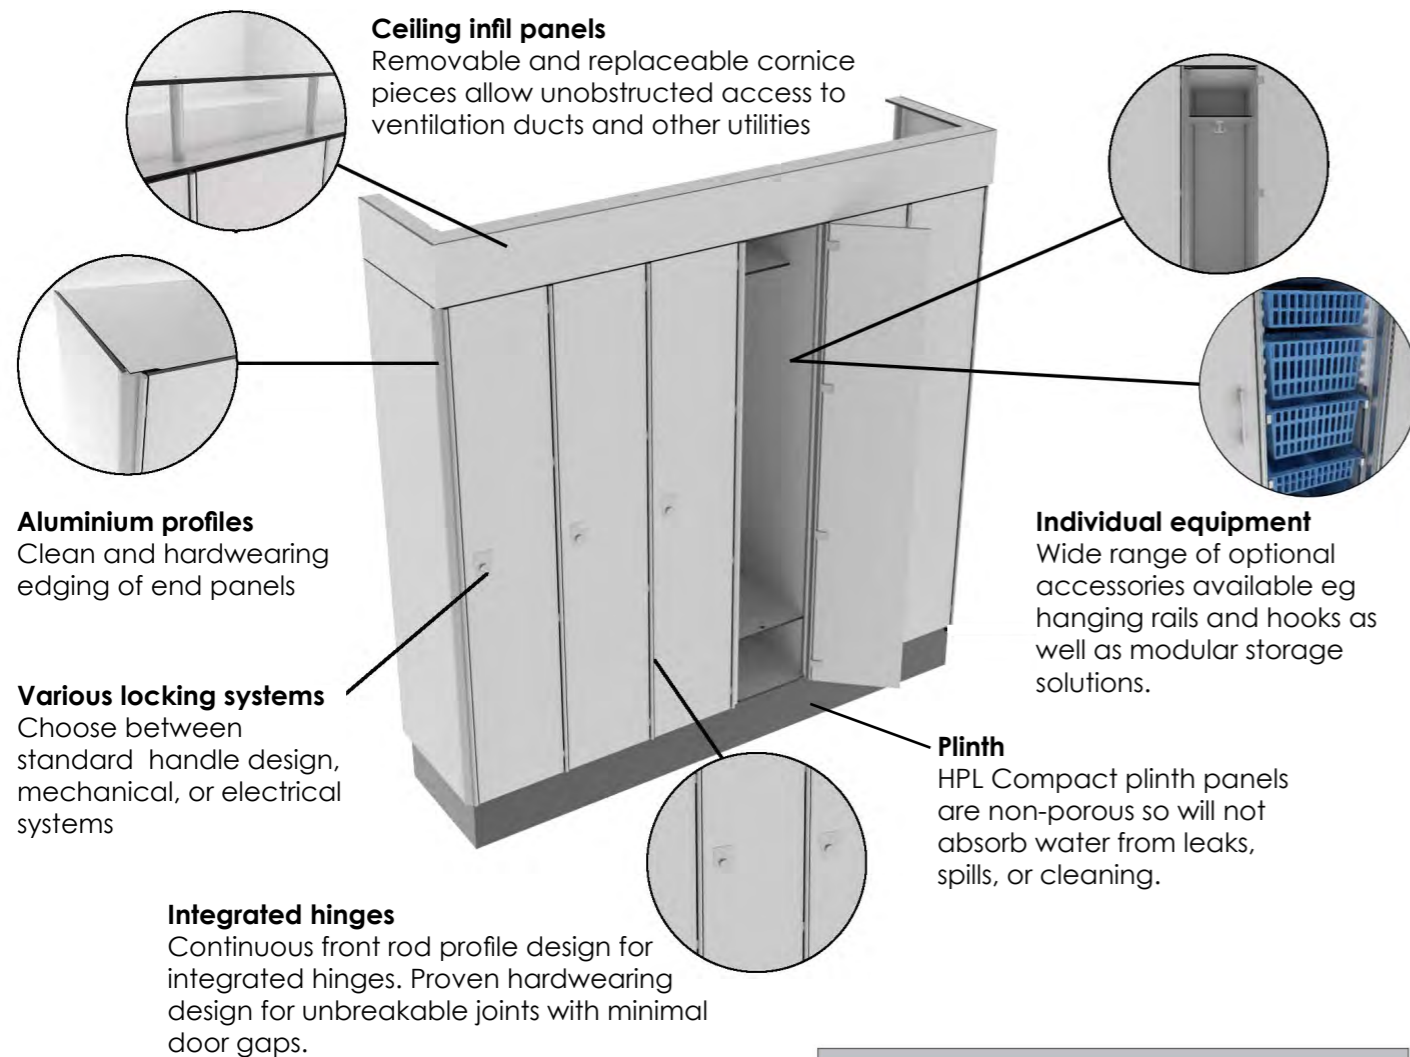

Properties	HPL Compact	HPL coated carrier board	Wooden board	Steel / Sheet Metal
hygienic and easy to clean	●●●	●●○	●○○	●●○
antibacterial	●●●	●○○	○○○	○○○
alkali and acid resistant	●●●	●●○	○○○	○○○
flame retardant	●●●	●○○	○○○	●●●
waterproof	●●●	○○○	○○○	●●○
corrosion free	●●●	●●●	●●●	●○○
impact and scratch resistant	●●●	●○○	●○○	○○○

INNOVATIVE FURNITURE SYSTEMS

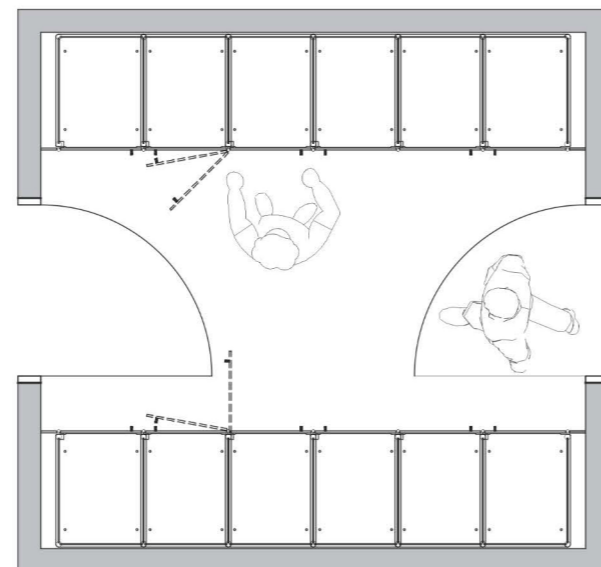

Functionality meets professional creativity

Due to our special composite construction made of compact panels in connection with our specially developed aluminium profile and fitting system, we can guarantee the functionality of our furniture for decades. Each item is manufactured to order so individual cabinet dimensions can be achieved to optimise use of stand and storage space available. Later additions or extensions can be incorporated easily.

Cabinet doors that can be opened up to 180 degrees* have the following advantages:

- wider passages
 - reduced risk of injury due to open doors
 - easy and fast access to the baskets from various angles
 - optimal use of the available space
- * depending on lock / handle model

UNCOMPROMISING QUALITY

Premium engineered material

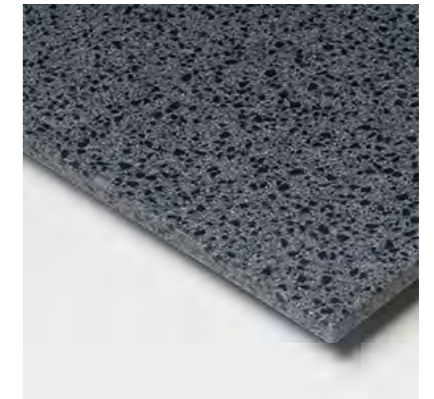

Through our experience we have selected the best quality raw materials in order to offer you the highest quality of finish from our products. To compliment our HPL Compact, we also offer solid surface materials for situations where seamless and joint-less detailing is required.

Used particularly in clinical and hygienic environments, primarily for the manufacture of wash basins and sink areas due to its easy clean and care properties, it can also be used in counter and furniture construction. Solid Surface materials are suitable for use in wet environments and are dimensionally stable as well as resistant to cleaning and other damage. Solid Surface material offers almost limitless design options in terms of shape and colour.

Properties mineral material:

- seamless, jointless and pore-free
- extremely solid and impact-resistant
- flame retardant
- very hard-wearing and durable
- disinfectant-resistant
- easy-care and hygienic
- available in various shapes and colours

Increased antibacterial and antiviral surface treatment available on request - kills over 96% of viruses within 2 hours

COMPREHENSIVE RANGE OF SERVICES

Authentic facilities with personality

Thanks to our many years of experience, we can offer you an extensive product portfolio for all areas from leisure and education to clinical and healthcare.

Our product range extends from our core locker and cubicle solutions to receptions, treatment rooms, sanitary facilities, laboratories, and staff changing rooms.

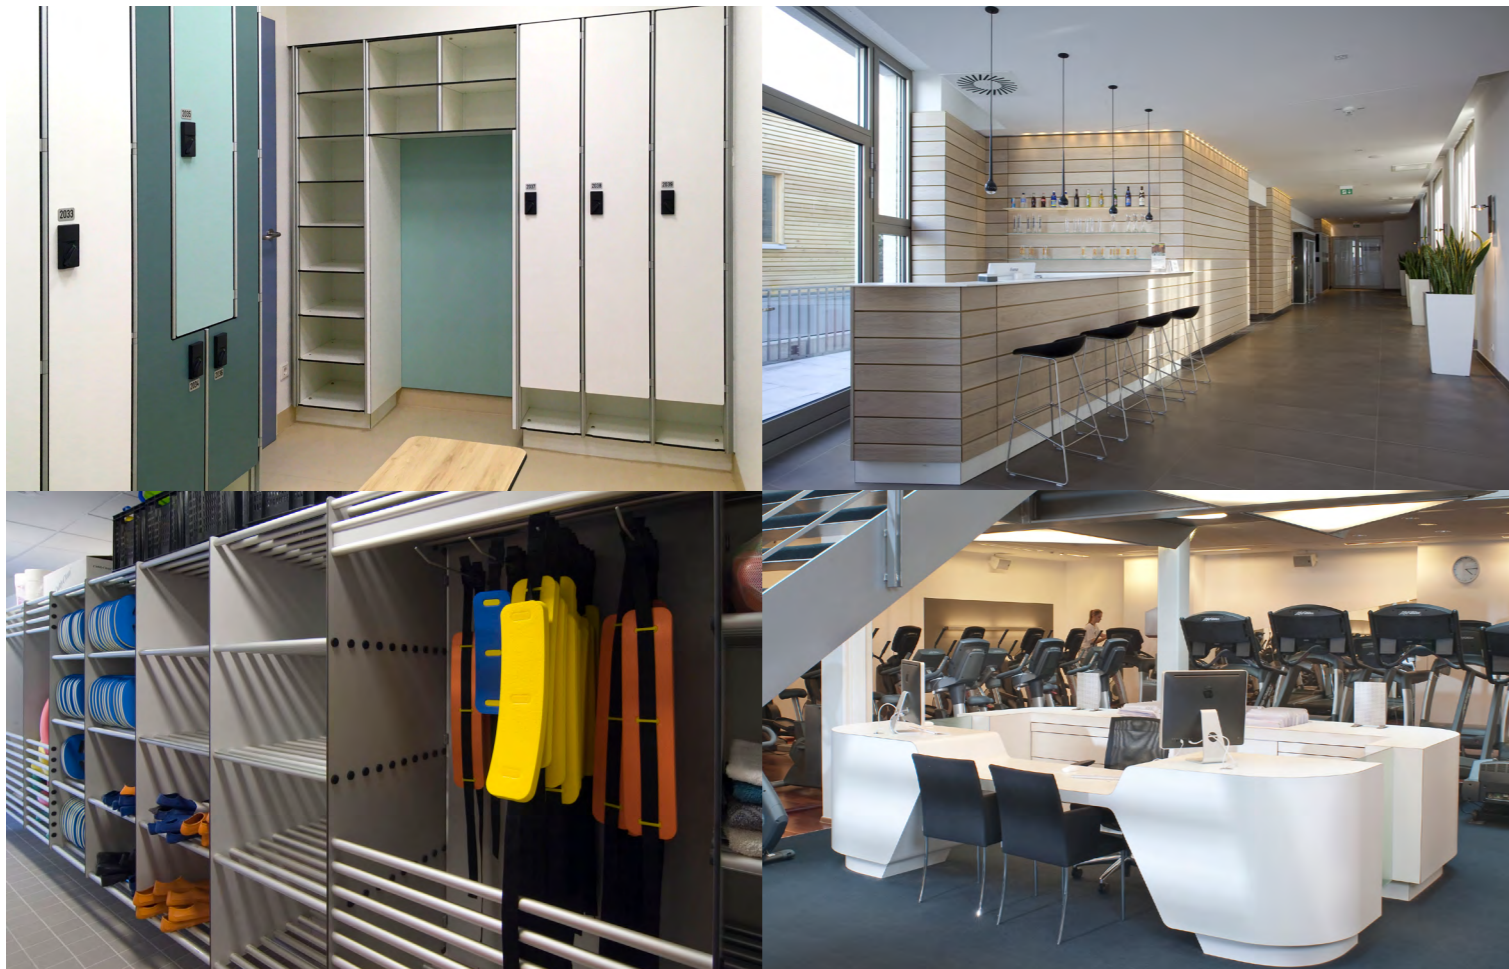

Our planners, product developers and interior designers always respond to your wishes and the needs of your employees, customers and guests as well as the local conditions in a problem and customer-oriented manner.

We develop authentic and functional design concepts prioritising the needs of your company or club and responding to your needs with a customer-oriented and pragmatic approach.

Our portfolio includes:

- changing cupboards and cubicles
- locker systems and benches
- custom storage furniture
- washstands and vanity units
- hygiene stations
- reception systems
- office workstations
- bistro bars
- tables
- shelves and ledges
- shower panels
- medicine cabinets
- changing and linen cupboards
- mobile patient cabinets
- duty stations
- clinical storage units
- revisable wall cladding and wall protection
- office workstations
- reception systems
- tables
- safe deposit boxes
- washstands

... and much more. Your goals inspire us.

ALL-ROUND CAREFREE PACKAGE

Full-service support for your project

Successful interior design and good service start with advice and go beyond assembly. Our competent team of planners, architects and fitters is at your side from the first conversation to the after-sale. In this way we can implement your visions and wishes in a targeted and professional manner.

Our full-service support includes:

- individual advice
- non-binding offer preparation
- three-dimensional project presentation on request
- customer and solution-oriented planning
- own production with quality monitoring according to DIN EN ISO 9001
- on-time assembly with permanent fitters
- comprehensive after-sales service

Streamlined logistics effort

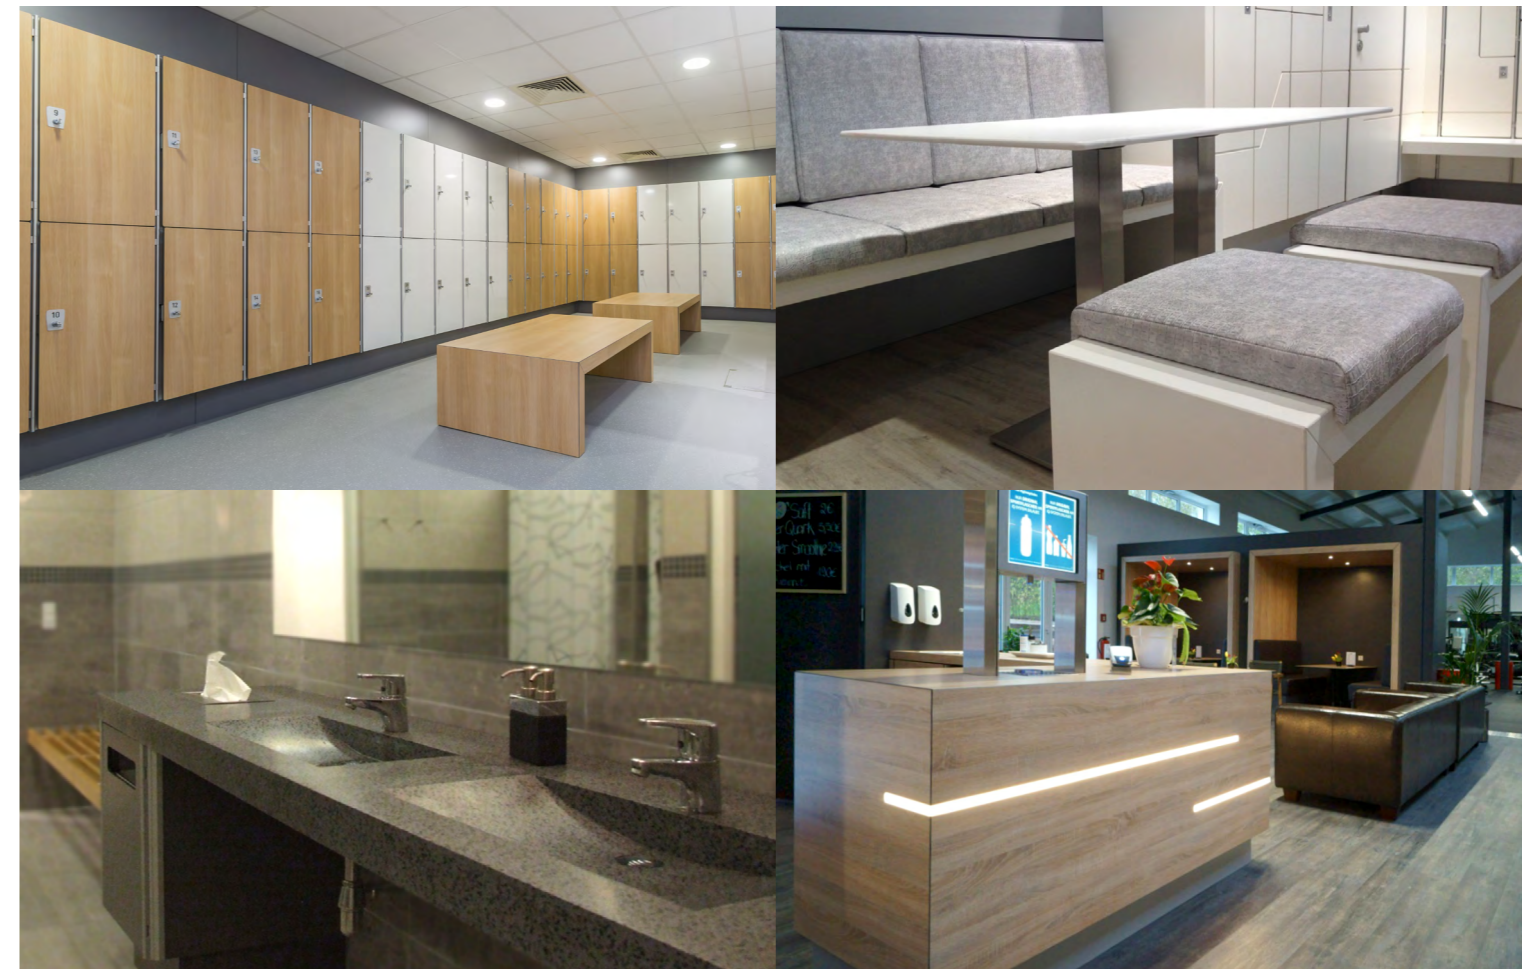

We deliver large cabinets completely disassembled on pallets and assemble them on site. This reduces packaging material and the logistical effort on site.

- fewer trucks attending the construction site
- lower risk to damage already finished walls, floors and the like during the introduction
- less space required for temporary storage due to the flat packed pallets
